

is the same as the inner diameter d3 of the press-fit undergoing portion 10A of the expanded tube-shape.

AMENDMENTS TO THE ABSTRACT

Please revise the Abstract of the Disclosure as follows:

There is provided a resin tube-equipped quick connector capable of connecting a fuel-transporting resin tube to a mating pipe without hindrance even if the resin tube has a small diameter. The quick connector is constructed such that it includes a connector body having a press-fitting portion, and a retainer. On the other hand, a press-fit undergoing portion of the resin tube into which the press-fitting portion is to be press-fitted is beforehand expanded in tube diameter prior to the press-fitting, and the press-fitting portion is press-fitted into the expanded press-fit undergoing portion in a withdrawal-preventing condition to provide the quick connector equipped with the resin tube.

~~The quick connector 16 is constructed such that it includes a connector body 18 having a press fitting portion 28, and a retainer 20. On the other hand, a press fit undergoing portion 10A of the resin tube 10 into which the press fitting portion 28 is to be press fitted is beforehand expanded in tube diameter prior to the press fitting, and the press fitting portion 28 is press fitted into the expanded press fit undergoing portion 10A in a withdrawal preventing condition to provide the quick connector 16 equipped with the resin tube 10.~~
